Methodology

Methodology

This document presents the results from an IFOP survey. It is in compliance with the scientific and ethical principles of sample surveys. Its findings reflect a state of opinion at the time of survey and does not convey any prediction.

No publication either in full or partial may be made without the express agreement of IFOP.

Survey conducted by IFOP for CAM4

Sample

The survey was carried out among a representative sample of the female population aged 18 and above in the following countries:

-  Italy: 1,007 women
-  Spain: 1,003 women
-  France: 1,003 women
-  Germany: 1,002 women
-  Netherlands: 1,005 women
-  United Kingdom: 1,002 women
-  United States: 1,039 women
-  Canada: 1,000 women

Methodology

In each country, the survey was conducted among a sample of which the representativeness was guaranteed by using a quota method (age, profession of the interviewee, official matrimonial status) following a stratification by region. The data ensuring the representativeness of the results were drawn from data supplied by:

- The Census (Census 2011) for the Canada
- The Current Population Survey (CPS 2015) for the United States
- The European Union Labour Force Survey (EU LFS 2011) for European countries

Collection method

Interviews were conducted through a self-administered online questionnaire from 3 to 12 November 2015.

Precision regarding margins of error

Statistical theory is used to estimate the uncertainty pertaining to each survey result. This uncertainty is indicated as a confidence interval at either side of the observed value forming a range that is likely to hold the true value, according to a determined probability. This uncertainty, generally called the "margin of error", varies depending on the size of the sample and the percentage observed, as shown in the following table:

95% CONFIDENCE INTERVAL						
<i>Size of sample</i>	<i>If the percentage found is...</i>					
	5 or 95%	10 or 90%	20 or 80%	30 or 70%	40 or 60%	50%
100	4,4	6,0	8,0	9,2	9,8	10,0
200	3,1	4,2	5,7	6,5	6,9	7,1
300	2,5	3,5	4,6	5,3	5,7	5,8
400	2,2	3,0	4,0	4,6	4,9	5,0
500	1,9	2,7	3,6	4,1	4,4	4,5
600	1,8	2,4	3,3	3,7	4,0	4,1
700	1,6	2,3	3,0	3,5	3,7	3,8
800	1,5	2,1	2,8	3,2	3,5	3,5
900	1,4	2,0	2,6	3,0	3,2	3,3
1 000	1,4	1,8	2,5	2,8	3,0	3,1
2 000	1,0	1,3	1,8	2,1	2,2	2,2
3 000	0,8	1,1	1,4	1,6	1,8	1,8
4 000	0,7	0,9	1,3	1,5	1,6	1,6
5 000	0,6	0,8	1,1	1,3	1,4	1,4
6 000	0,6	0,8	1,1	1,3	1,4	1,4
8 000	0,5	0,7	0,9	1,0	1,1	1,1
10 000	0,4	0,6	0,8	0,9	0,9	1,0

Example of how to interpret the table: if there are 1,000 people in the sample, and the surveyed percentage is 10%, the margin of error is equal to 1.8. The true percentage is therefore between 8.1% and 11.8%.
